This fixture will not be install but the item are given as spare in case you need it but is not necessary.

To install, it require chosen table both put on the flat surface and install as seen on the video. Table A+B can but C maybe not possible if they are not chosen. Like a marriage that need register to consider as married.

In short, Table A,B,C and so on...need to lay flat to install the joint and all together to get it right. Other table may not able to join as the joint only consider those who match marked them will join easily.
